Tim Tyler has a thirty-year career in health care. Tim has lead Departments of Radiology, Laboratory, Cardiopulmonary and Central Scheduling since 2007. He is a native of Chicago, IL. Tim was raised in a household with a father that provided, a mother who was a nurse, three sisters who are nurses. He was nurtured to care for the sick.

Today, Tim is humbled and privileged to work in a profession where he attends to people at the lowest and most vulnerable point in their lives. Many of the lives Tim encounters come from medically underserved communities with no means of primary care. When these patients arrive at his department, Tim's motivation and responsibility is to ensure that everyone under his leadership is compassionate, respectful and caring.

Tim Tyler is most proud of the diverse communities he has served and the people he has mentored and coached through the years. Tim has worked in close-nit rural medically underserved towns, affluent suburbs, medically underserved inner-city communities and in states from Arizona to Virginia.

Tim has been in healthcare as an X-Ray Technologist since 1990 and management since 1999. While not at work Tim enjoys spending time with his children, including a set of twins. He is an avid football fan, enjoys working out and has a reputation as a creative DJ.
